SUMMARY

MERN Stack Developer with experience building scalable web applications featuring real-time communication, payment systems, and modern frontend architectures.

Currently working as a Frontend Developer Intern, developing responsive and user-focused interfaces using React.

Built production-oriented applications with WebSockets, Stripe payments, JWT authentication, and real-time state synchronization, focusing on performance and user experience.

EDUCATION

AIF - American Indian Foundation

Full Stack Web Development

Sector-2, Noida

Aug. 2025 – Nov 2025

Indira Gandhi National Open University

Bachelor of Computer Applications

Rajouri Garden

July. 2022 – June 2025

Lal Bahadur Shastri Training Institute

Web Designing

Phase-3, Delhi

Oct. 2022 – Sep 2023

EXPERIENCE

Frontend Developer Intern

Meru Technosoft Pvt. Ltd.

Mar 2026 – Present

- Developed responsive UI components for a multi-industry application (hellobooks.ai) using React, Redux, Tailwind
- Built reusable interfaces across 10+ business modules including relocation services, domain hosting, and housing society management.
- Improved UI consistency and maintainability through modular component design.
- Collaborated with developers to implement features, debug issues, and improve UI responsiveness.

PROJECTS

ShopSizzle | Live | GitHub | *React, Zustand, Tailwind CSS, Node.js, Express, MongoDB, Redis, Stripe*

- Built a production-grade full-stack e-commerce platform with end-to-end workflows including product discovery, cart management, and checkout.
- Integrated Stripe payment gateway with secure backend validation and automated order creation post-transaction.
- Built a dynamic coupon system with validation, discount logic, and edge-case handling for real-world scenarios.
- Implemented JWT-based authentication with Redis-backed session management and optimized performance using caching strategies.

PingUp | Live | GitHub | *React, Redux Toolkit, Tailwind CSS, Node.js, Express, MongoDB, SSE, Clerk, Inngest*

- Built a full-stack social platform with user discovery, connection workflows, and personalized feeds.
- Implemented real-time messaging using Server-Sent Events with instant updates and route-aware notifications.
- Designed a social graph system supporting follow, connection requests, and bidirectional relationship management with consistent state updates.
- Integrated Clerk authentication with MongoDB user sync and built event-driven workflows using Inngest for background jobs and automation.

TECHNICAL SKILLS

Core: JavaScript (ES6+), HTML5, CSS3

Frontend: React, Redux Toolkit, Zustand, Tailwind CSS, GSAP, React Router, Axios

Backend: Node.js, Express.js

Database: MongoDB, Redis

Tools: Git, GitHub, Postman, Firebase, Cloudinary

Concepts: Socket.IO, Rate Limiting, Stripe Integration, JWT Authentication, REST APIs
